Cp. 2

Stocks of Grains

in All Positions

July 25, 1960

STOCKS OF CORN, WHEAT, AND SORGHUM GRAIN INCREASE

July 1 stocks of corn and sorghum grain moved well above previous record levels and wheat edged slightly above the previous record. Stocks of corn at 2,563 million bushels jumped 16 percent above the record level of the previous year. Sorghum grain stocks of 636 million bushels were a fifth above the record level of last year. Increased stocks of corn and sorghum grain much more than offset smaller holding of oats and barley giving a record total feed grain tonnage of 97.9 million tons, more than a tenth above a year ago. Wheat stocks moved moderately above the record level of last July 1 with the 1,313 million bushels nearly double average stocks. Rye stocks were reduced to 10 million bushels but were above average. Soybeans were the second largest of record with 137 million bushels held in all storage positions but flaxseed stocks of 3.1 million bushels were the lowest of record.

Wheat stocks of 1,313 million bushels stored in all positions on July 1 were slightly larger than last year and a record for the date. Total stocks were nearly a sixth larger than the 1959 production with more than 95 percent of the stocks owned by CCC and under CCC loan. Off-farm stocks of 1,216 million bushels were the largest of record and 3 percent above the previous year.

Rye stocks of 10.4 million bushels stored in all positions were 18 percent less than the relatively large carry-over a year earlier but 7 percent above average. Stocks in each storage position, except for terminals, were less than July 1 a year ago. Off-farm stocks of 8.6 million bushels were 4 percent above last year and nearly a fifth above average. Stocks at interior mills and elevators of 3.8 million bushels were about a third less than a year ago but more than one-half larger than average.

Corn stocks in all storage positions July 1 were 2,563 million bushels, 16 percent above the previous record for the date set last year. Stocks in interior mills, elevators and warehouses at 584 million bushels were nearly a third larger than a year ago. Stocks in all off-farm positions were 1,228 million bushels and were mostly CCC owned and under warehouse loan. Stocks on farms at 1,335 million bushels were 19 percent larger than on July 1, 1959 with more than 40 percent under CCC loans, including resale and purchase agreements outstanding. Total disappearance during the April-June quarter was 844 million bushels, 7 percent above the same quarter last year.

Oat carryover stocks of 270 million bushels in all storage positions were about a fourth less than last year's large carryover and 2 percent below average. Stocks are well below a year ago in all storage positions, and 85 percent of the total stocks were stored on farms. Oats under loan to and owned by the CCC

UNITED STATES DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

Crop Reporting Board

GrLg 11-1 (7-60)

Washington, D. C.

accounted for 13 percent of the total stocks compared with 27 percent a year earlier. Disappearance during the April-June quarter amounted to 218 million bushels, about a fourth less than the same quarter last year.

Barley stocks in all positions on July 1 totaled 167 million bushels, 14 percent below last year's record high. Both farm and off-farm stocks show about the same decline from a year ago, and two-thirds of the total stocks were held in off-farm positions. About three-fifths of the barley stocks were under loan to and owned by the CCC compared with about four-fifths a year earlier. Disappearance of barley during the April-June quarter was 79 million bushels, nearly a fifth below the record of the same quarter last year.

Sorghum grain stocks in all positions on July 1, at 636 million bushels, were a record high for that date and 20 percent above a year earlier. Stocks in all off-farm positions totaled 592 million bushels of which nearly 97 percent was CCC owned. Farm stocks of 44 million bushels were nearly a third above a year ago with more than a third under CCC loan. Disappearance during the April-June quarter was 110 million bushels compared with 82 million bushels during the same period in 1959.

Flaxseed carryover stocks in all storage positions on July 1 totaled 3.1 million bushels, the smallest of record. This is about one-fifth as large as the previous year and one-fourth of average. Most of the stocks on July 1 were in off-farm positions with nearly three-fourths of the total stocks located in North Dakota and Minnesota. July 1 stocks indicate a disappearance during the period July 1959 through June 1960 of 34.3 million bushels from a supply of 37.4 million bushels. During the period, crushings amounted to 23.2 million bushels, exports 8.4 million bushels and about 2.3 million bushels were used for seed.

Soybean stocks estimated at 137 million bushels in all storage positions on July 1 were the second highest of record for the date, being exceeded only by the 158 million bushels a year ago.

Stocks on July 1 indicated a disappearance during the 9 months October 1959-June 1960 of 464 million bushels from a supply of 600 million bushels. The supply consisted of a carry-over of 62 million plus 1959 production of 538 million bushels. During the period 302 million bushels were processed for oil and 113 million bushels were exported. Seed and feed amounted to 31 million and at least 6 million bushels of the 1959 crop were crushed before October 1. In addition there are always some unaccountable losses from a crop of this size. The indicated disappearance is out of balance about 2 percent, well within the range of possible error in production, stocks, and or disappearance estimates.

Stocks of grains, July 1, 1960 with comparisons
(in thousand bushels)

1/ Estimates of the Crop Reporting Board.

2/ Commercial stocks reported by Grain Division, AMS, at 44 Terminal cities.

3/ Owned by CCC and stored in bins or other storages owned or controlled by CCC; other CCC-owned grain is included in the estimates by positions.

4/ All off-farm storages not otherwise designated, including merchant mills.

5/ Firms reporting crushings and stocks of soybeans to the Bureau of the Census.
